

L^AT_EX 2_ε Document Styles for the
Department of Electronics and Computer Science
File version v1.6, dated 2003/25/04

Steve R. Gunn

Printed September 25, 2003

1 Description

These L^AT_EX 2_ε document classes are designed to produce thesis, mini-thesis, progress, project, report, GDP report and GDP summary report documents which conform to the University of Southampton guidelines of April 2001. They are based on the document class `book`, but modify some of its layout decisions. An article class is also provided which is based on the document class `article`.

2 The DOCSTRIP modules

The following modules are used in the implementation to direct DOCSTRIP when generating the external files:

thesis	produce the <code>ecsthesis</code> document class
minithesis	produce the <code>ecsminithesis</code> document class
progress	produce the <code>ecsprogress</code> document class
project	produce the <code>ecsproject</code> document class
report	produce the <code>ecsreport</code> document class
article	produce the <code>ecsarticle</code> document class
gdp	produce the <code>ecsgdp</code> document class
gdpsummary	produce the <code>ecsgdpsummary</code> document class
testthesis	produce an example thesis
testminithesis	produce an example minithesis
testprogress	produce an example progress
testproject	produce an example project
testreport	produce an example report
testarticle	produce an example article
testgdp	produce an example GDP report
testgdpsummary	produce an example GDP summary report
introduction	produce an example introduction chapter
conclusions	produce an example conclusions chapter
appendix	produce an example appendix chapter
figure	produce an example figure file
definitions	produce an example definitions file
references	produce an example references file
bst	produce a bibliography style file
driver	produce a documentation driver file

3 Implementation

All options are passed on to the `book` or `article` class.

```
1 <thesis | minithesis | progress | project | report | article | gdp | gdpsummary>
```

`\baseclass`

```
2 <thesis | minithesis | progress | project | report | gdp | gdpsummary>
3 \def\baseclass{book}
4 </thesis | minithesis | progress | project | report | gdp | gdpsummary>
5 <article>
6 \def\baseclass{article}
7 </article>

8 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{\baseclass}}
```

`\@checkoptions`

Before we can process the options we must deal with a small problem. That is, we want to change the default options of the `book` or `article` class to `a4paper` and `11pt` or `12pt` but the macro `\ProcessOptions` used by the `book` or `article` class processes the options in the order specified in the file. Because `a4paper` is the first of the paper sizing options it will be overridden by any user defined option. But the same is not true of the font size option `11pt` or `12pt`. To remedy this we define a macro `\@checkoptions{<default>}{<option-list>}` which checks to see if any options in `<option-list>` have been specified and if not adds `<default>` to the option list.

```
9 \def\@checkoptions#1#2{
```

```

10 \edef\@curroptions{\@optionlist{\@currname.\@current}}
11 \@tempwafalse
12 \@tfor\@this:=#2\do{
13   \@expandtwoargs\in@{\@this,}{,\@curroptions,}
14   \ifin@ \@tempwatrue \@break@tfor \fi
15   \let\@this\empty
16   \if@tempswa \else \PassOptionsToClass{#1}{\baseclass}\fi
17 }

```

With this macro at our disposal we can continue to process the options

```

18 <*thesis | minithesis | progress | report | article | gdp | gdpsummary>
19 \@checkoptions{11pt}{10pt}{11pt}{12pt}
20 </thesis | minithesis | progress | report | article | gdp | gdpsummary>
21 <*project>
22 \@checkoptions{12pt}{10pt}{11pt}{12pt}
23 </project>
24 \PassOptionsToClass{a4paper}{\baseclass}
25 \ProcessOptions\relax

```

and load the book or article document class with A4 as the default paper size.

```
26 \LoadClass{\baseclass}
```

3.1 Banner

`\bhrule` Provide a function to produce a banner on the output making the location of the
`\btypeout` current section simpler.

```

27 \newcommand\bhrule{\typeout{-----}}
28 \newcommand\btypeout[1]{\bhrule\typeout{\space #1}\bhrule}

```

3.2 Date

`\today` This macro uses the \TeX primitives `\month`, `\day` and `\year` to provide the date of the \LaTeX -run in a suitable format.

```

29 <*thesis>
30 \def\today{\ifcase\month\or
31   January\or February\or March\or April\or May\or June\or
32   July\or August\or September\or October\or November\or December\fi
33   \space \number\year}
34 </thesis>

```

4 Document Layout

4.1 Spacing

Load the `setspace` package so that spacing can easily be set. The text in all three styles is set to one and a half spacing, paragraphs not indented, and a newline between paragraphs.

```

35 \usepackage{setspace}
36 <thesis | minithesis | progress | project | report | gdp | gdpsummary>\onehalfspacing
37 <article>\singlespacing

```

```
38 \setlength{\parindent}{0pt}
39 \setlength{\parskip}{2.0ex plus0.5ex minus0.2ex}
```

4.2 Margins

Load the `vmargin` package to setup the page dimensions.

```
40 \usepackage{vmargin}
41 (*thesis | minithesis | progress | project | report | gdp | gdpsummary)
42 \setmarginsrb          { 1.5in} % left margin
43                      { 0.6in} % top margin
44                      { 1.0in} % right margin
45                      { 0.8in} % bottom margin
46                      { 20pt}  % head height
47                      {0.25in} % head sep
48                      { 9pt}   % foot height
49                      { 0.3in} % foot sep
50 (/thesis | minithesis | progress | project | report | gdp | gdpsummary)
51 (*article)
52 \setmarginsrb          { 0.8in} % left margin
53                      { 0.6in} % top margin
54                      { 0.8in} % right margin
55                      { 0.8in} % bottom margin
56                      { 20pt}  % head height
57                      {0.25in} % head sep
58                      { 9pt}   % foot height
59                      { 0.3in} % foot sep
60 (/article)
```

4.3 Breaks

Control how pages and lines are broken.

```
61 \raggedbottom
62 \setlength{\topskip}{1\topskip \@plus 5\p@}
63 \doublehyphendemerits=10000 % No consecutive line hyphens.
64 \brokenpenalty=10000 % No broken words across columns/pages.
65 \widowpenalty=9999 % Almost no widows at bottom of page.
66 \clubpenalty=9999 % Almost no orphans at top of page.
67 \interfootnotelinepenalty=9999 % Almost never break footnotes.
```

4.4 Fancy Page Headers

Setup the the default fancy page headers with an underlined header containing chapter, name and page number.

```
68 \usepackage{fancyhdr}
69 \lhead[\rm\thepage]{\fancyplain{}{\sl{\rightmark}}}
70 \rhead[\fancyplain{}{\sl{\leftmark}}]{\rm\thepage}
71 \chead{}\lfoot{}\rfoot{}\cfoot{}
72 \pagestyle{fancy}
```

```
\chaptermark Redefine chaptermark and sectionmark to set up the correct header name and
\sectionmark produce a banner on the output making the location of messages simpler.
\subsectionmark
```

```
73 (*thesis | minithesis | progress | project | report | gdp)
```

```

74 \renewcommand{\chaptermark}[1]{\btypeout{\thechapter\space #1}\markboth{\@chapapp\ \thechapter
75 \renewcommand{\sectionmark}[1]{}}
76 \renewcommand{\subsectionmark}[1]{}}
77 </thesis | minithesis | progress | project | report | gdp)
78 (*article)
79 \renewcommand{\sectionmark}[1]{\btypeout{\thesection\space #1}}
80 \renewcommand{\subsectionmark}[1]{}}
81 \renewcommand{\subsubsectionmark}[1]{}}
82 </article)
83 (gdpsummary)\markboth{GDP Summary Report}{GDP Summary Report}

```

`\cleardoublepage` Redefine `cleardoublepage` to remove headers from blank pages in twosided documents.

```

84 \def\cleardoublepage{\clearpage\if@twoside \ifodd\c@page\else
85 \hbox{}}
86 \thispagestyle{empty}
87 \newpage
88 \if@twocolumn\hbox{}\newpage\fi\fi\fi}

```

4.5 Mathematics

Load the `amsmath` packages, so we can do some serious math, and setup the theorem environments.

```

89 \usepackage{amsmath,amsfonts,amssymb,amscd,amsthm,xspace}
90 \theoremstyle{plain}
91 (*thesis | minithesis | progress | project | report | gdp)
92 \newtheorem{example}{Example}[chapter]
93 \newtheorem{theorem}{Theorem}[chapter]
94 </thesis | minithesis | progress | project | report | gdp)
95 (*article | gdpsummary)
96 \newtheorem{example}{Example}[section]
97 \newtheorem{theorem}{Theorem}[section]
98 </article | gdpsummary)
99 \newtheorem{corollary}[theorem]{Corollary}
100 \newtheorem{lemma}[theorem]{Lemma}
101 \newtheorem{proposition}[theorem]{Proposition}
102 \newtheorem{axiom}[theorem]{Axiom}
103 \theoremstyle{definition}
104 \newtheorem{definition}[theorem]{Definition}
105 \theoremstyle{remark}
106 \newtheorem{remark}[theorem]{Remark}

```

4.6 Captions

`\fref` Load the `caption2` package to improve formatting of captions, and provide short
`\tref` referencing commands.

```

\eref 107 \usepackage[centerlast,small,sc]{caption2}
\cref 108 \setlength{\captionmargin}{20pt}
\sref 109 \newcommand{\fref}[1]{Figure~\ref{#1}}
\aref 110 \newcommand{\tref}[1]{Table~\ref{#1}}
111 \newcommand{\eref}[1]{Equation~\ref{#1}}
112 \newcommand{\cref}[1]{Chapter~\ref{#1}}

```

```

113 \newcommand{\sref}[1]{Section~\ref{#1}}
114 \newcommand{\aref}[1]{Appendix~\ref{#1}}

```

4.7 Float Placement

`\topfraction` Preventing figures from appearing on a page by themselves. L^AT_EX's figure placement algorithm is quite biased in favour of putting figures on a page by themselves, instead of on the top of a page with some text below it. Fortunately, the parameters of the algorithm can be changed. The main problem is that L^AT_EX per default only allows a part of the top of a text-page (70%) to contain figures, and requires at least 20% of a page to be text when text and figures share a page. These parameters should be set to more reasonable values, for example 85% and 10%.

```

115 \renewcommand{\topfraction}{0.85}
116 \renewcommand{\bottomfraction}{.85}
117 \renewcommand{\textfraction}{0.1}
118 \renewcommand{\dbltopfraction}{.85}

```

`\floatpagefraction` This helps, but sometimes L^AT_EX puts a figure on a page by itself, although it would fit perfectly well on the top of a page. This happens when the figure will not fit on the page where it was defined. L^AT_EX then attempts to put it on a figures-only page before it attempts to put it at the top of the next page. A page may contain figures alone if the figure(s) use at least half the page. To prevent half-empty pages this limit should probably be increased to around 75%.

```

119 \renewcommand{\floatpagefraction}{0.75}
120 \renewcommand{\dblfloatpagefraction}{.75}

```

Be careful not to make `floatpagefraction` larger than `topfraction`, then you risk to produce a figure that can neither go on the top of a text page, nor on a page by itself. If that happens, the figure and all later figures will be postponed until next time a `clearpage` is executed (typically at the end of a chapter or the end of the document). This will also happen if a figure is too large to fit on a page.

```

121 \setcounter{topnumber}{9}
122 \setcounter{bottomnumber}{9}
123 \setcounter{totalnumber}{20}
124 \setcounter{dbltopnumber}{9}

```

4.8 Graphics

Load the `graphicx` package, so we can include pictures easily. Load the `epstopdf`, so that eps files are automatically converted to pdf when pdfL^AT_EX is used. This requires a version of *epstopdf* to be installed on you system. You can find a windows version at

<http://www.ctan.org/tex-archive/support/epstopdf/epstopdf.exe>.

```

125 \usepackage{graphicx}
126 \usepackage{epstopdf}

```

4.9 Subfigures and subtables

Load the `subfigure` package, so we can include subfigures easily.

```

127 \usepackage[scriptsize]{subfigure}

```

```

128 \usepackage{booktabs}
129 \usepackage{rotating}

```

4.10 Listings

Load the `listings` package, so we can include listings easily.

```

130 \usepackage{listings}
131 \usepackage{lstpatch}
132 \lstset{captionpos=b,
133         frame=tb,
134         basicstyle=\scriptsize\ttfamily,
135         showstringspaces=false,
136         keepspaces=true}
137 \lstdefinestyle{matlab} {
138     language=Matlab,
139     keywordstyle=\color{blue},
140     commentstyle=\color[rgb]{0.13,0.55,0.13}\em,
141     stringstyle=\color[rgb]{0.7,0,0} }

```

4.11 Hyperlinks

Load the `hyperref` package to provide hyperlinks in pdf and dvi documents.

```

142 \usepackage[pdfpagemode={UseOutlines},bookmarks=true,bookmarksopen=true,
143     bookmarksopenlevel=0,bookmarksnumbered=true,hypertextnames=false,
144     colorlinks,linkcolor={blue},citecolor={blue},urlcolor={red},
145     pdfstartview={FitV},unicode,breaklinks=true]{hyperref}
146 \pdfstringdefDisableCommands{
147     \let\\\space
148 }

```

5 Internal Names

<code>\supervisor</code>	The various elements of the documents are defined as control sequences to make
<code>\examiner</code>	it easy to customize this style for other parts of the University.
<code>\degree</code>	
<code>\authors</code>	149 <code>\newcommand*\{supervisor}[1]{\def\supname{#1}}</code>
<code>\addresses</code>	150 <code>\newcommand*\{examiner}[1]{\def\examname{#1}}</code>
<code>\university</code>	151 <code>\newcommand*\{degree}[1]{\def\degreename{#1}}</code>
<code>\UNIVERSITY</code>	152 <code>\newcommand*\{authors}[1]{\def\authornames{#1}}</code>
<code>\department</code>	153 <code>\newcommand*\{addresses}[1]{\def\addressnames{#1}}</code>
<code>\DEPARTMENT</code>	154 <code>\newcommand*\{university}[1]{\def\univname{#1}}</code>
<code>\group</code>	155 <code>\newcommand*\{UNIVERSITY}[1]{\def\UNIVNAME{#1}}</code>
<code>\GROUP</code>	156 <code>\newcommand*\{department}[1]{\def\deptname{#1}}</code>
<code>\faculty</code>	157 <code>\newcommand*\{DEPARTMENT}[1]{\def\DEPTNAME{#1}}</code>
<code>\FACULTY</code>	158 <code>\newcommand*\{group}[1]{\def\groupname{#1}}</code>
<code>\subject</code>	159 <code>\newcommand*\{GROUP}[1]{\def\GROUPNAME{#1}}</code>
<code>\keywords</code>	160 <code>\newcommand*\{faculty}[1]{\def\facname{#1}}</code>
	161 <code>\newcommand*\{FACULTY}[1]{\def\FACNAME{#1}}</code>
	162 <code>\newcommand*\{subject}[1]{\def\subjectname{#1}}</code>
	163 <code>\newcommand*\{keywords}[1]{\def\keywordnames{#1}}</code>

<code>\supname</code>	The internal names of the elements are set to defaults appropriate to the Department of Electronics and Computer Science.

6.3 Contents Pages

6.3.1 Add to Table of Contents

Ensures numbering for sub-subsections in the table of contents, and provide for 6 levels to appear in toc. Define `addtotoc` to enable adding elements to the toc at chapter level, using a dummy counter to fix bookmarks in pdfL^AT_EX.

```
523 (*thesis | minithesis | progress | project | report | gdp | article)
524 \addtocounter{secnumdepth}{1}
525 \setcounter{tocdepth}{6}
526 \newcounter{dummy}
527 \newcommand\addtotoc[1]{
528 \refstepcounter{dummy}
529 (*thesis | minithesis | progress | project | report | gdp)
530 \addcontentsline{toc}{chapter}{#1}}
531 \end{thesis | minithesis | progress | project | report | gdp}
532 (*article)
533 \addcontentsline{toc}{section}{#1}}
534 \end{article}
```

6.3.2 Table of Contents

`\tableofcontents` Adjust line and paragraph spacing.

```
535 \renewcommand\tableofcontents{
536 \btypeout{Table of Contents}
537 \begin{spacing}{1}{
538   \setlength{\parskip}{1pt}
539   \if@twocolumn
540     \@restonecoltrue\onecolumn
541   \else
542     \@restonecolfalse
543   \fi
544 (*thesis | minithesis | progress | project | report | gdp)
545   \chapter*{\contentsname
546 \end{thesis | minithesis | progress | project | report | gdp}
547 (*article)
548   \section*{\contentsname
549 \end{article}
550     \@mkboth{
551       \MakeUppercase\contentsname}{\MakeUppercase\contentsname}}
552   \@starttoc{toc}
