**NEW** First Revision

# Logic Cross-Reference

## First Revision

### Introduction

This Logic Cross-Reference for Buyers, Distribution Specialists and others with an interest in Logic will assist in finding a device made by Texas Instruments that is identical or similar to many of our competitors' Logic products.

The Logic Cross-Reference is divided into several sections. The first sections list our major competitors and their orderable devices with the equivalent or similar TI orderable device. Sorting is by the function or 'root' of the device then by technology (i.e. AC, ACT, ALS, etc.). Pin counts and comments follow the TI orderable device.

The second section lists TI orderables and our competitors' orderables sorted alphabetically with the competitor's device following the TI device.

Designers and others needing more extensive information about the full range of Logic products from Texas Instruments should visit the Logic web site:

[www.logic.ti.com](http://www.logic.ti.com).

### Notice

The TI equivalent devices listed are suitable substitutes as qualified by the two comments columns. Every effort was made to insure the accuracy of this information but Texas Instruments does not guarantee or warrant that the cross-reference information is correct or complete in all cases. TI does not guarantee that interchangeability in a particular application is exact in all respects. The applicable data sheets should be used where questions arise about product interchangeability.

### Editor's Note

This is the second issue of what is planned as a semi-annual volume and it remains a work in progress. Competitors' products will be added or updated as information is discovered. All of a competitor's products of a particular technology may not be listed.

The data contained in this volume has been accumulated from publicly available data. In some cases, engineering judgment was used to determine the best 'cross'.

Your comments, suggestions and any errors that are found may be directed by e-mail to [logic-xref@list.ti.com](mailto:logic-xref@list.ti.com).

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
